

Dear Hiring Manager,

I'll keep this brief because I think the numbers speak louder than paragraphs.

I joined AHEAD as the 10th employee in India. The org is now 700+ strong. My team has grown from 10 to 100 engineers. That's the kind of org-building experience I'm bringing to your organisation.

Here's what I've delivered:

- Led a 50-member platform organisation through a leadership gap — established ownership models, improved incident response, maintained delivery continuity with zero major failures
- Currently managing 6 direct reports and influencing 20+ engineers across programs — running performance cycles, career development, hiring, and coaching engineers through difficult performance situations
- Delivering \$5M worth of active transformation programs with a CSAT score of 10/10 from customers and a 95%+ release success rate
- Led cloud transformation spanning 1,500+ VMs and 300+ applications across AWS, Azure, and GCP — enabling multi-million-dollar modernisation outcomes
- Built and deployed Generative AI platforms in production — RAG pipelines, LangChain, LangGraph, vector databases, and MLOps workflows — at enterprise scale
- Reduced cloud migration assessment timelines from 3 weeks to 10 minutes using AI-driven automation I engineered myself

What I'm looking for is the opportunity to own a larger engineering domain, scale a GCC engineering organisation, and drive platform direction from the ground up — exactly the kind of work I've been doing, now at a bigger stage.

Happy to connect at your convenience.
